DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6, 8-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Eberlein (DE 3833252 A1).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Eberlein in view of Mennesson (U. S. Patent no. 2,699,228).

Eberlein discloses all the limitations of the claim except for a clamp caliper. Mennesson teaches a clamp caliper. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use a clamp caliper as taught by Mennesson in the system of Eberlein as such is merely a design choice. Clamp Calipers are old and well known means of braking.

Art Unit: 3683

Examiner has assumed that the term clamping caliper refers to the embodiment in figure 2 only.

Response to Arguments

5. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.
